**PYROPIP**  
PRE IGNITION PREVENTION

# PyroPIP™ Fire Safe Power Point

Part No: **PYP-i-2GDPH**

Activation indicator

Cover plate removed

## Features

- Next generation electrical Double Pole general purpose outlet that helps prevent electrical fires before they start
- Prevents fires by detecting overheating at the power point, through its patented technology
- Protects against overheating due to high load and poor or loose connections
- Operates in conjunction with a circuit safety switch (RCD or RCBO)
- The circuit will de-energised once the PyroPIP heat threshold is reached
- Once the PyroPIP is activated due to overheating and the circuit is switched off, the indicator behind the cover plate will change colour for ease of fault location and replacement
- Double Pole Powerpoint

**PyroPIP – Protecting Power. Preventing Fire.**
