# Fluke TB25 Tool Bucket Organiser Bag, Fluke C37XT and Fluke C11XT EVA Foam Hard Case

Whether your customers are out in the field, in a workshop, or in a demanding workplace, they rely on Fluke instruments. To give their instruments the protection they deserve, Fluke has launched three new protective cases that are built with the rugged reliability Fluke is known for.

The **Fluke TB25 Tool Bucket Organiser Bag** is designed to safely carry and protect most Fluke test tools and accessories needed during any job. The TB25 combines the convenience of a tool bag with the structure and rigidity of a tool bucket to give your customers a versatile organiser that will fit hand tools, DMMs, clamp meters, test probes, and more. Whether your customer is a professional electrician, a field technician, or any other tradesman, they can rest easy knowing that their tools will be safe and secure since the TB25 is built with the rugged reliability Fluke is known for.

The **Fluke C11XT EVA Foam Hard Case** opens from the side with a zipper and includes a large pocket on one side for multiple accessories and a mesh pocket on the other side for one test tool. It is a recommended case for Fluke 110 Series Digital Multimeters, Fluke 170 Series True-RMS Digital Multimeters and Fluke 320 Series True-RMS Clamp Meters.

The **Fluke C37XT EVA Foam Hard Case** opens from the side with a zipper and features a divider with elastic straps to hold one test tool on one side, with two pockets and straps on the opposite side for accessories. Also includes space to secure an iFlex probe. It is a recommended case for most mid and large sized Fluke Multimeters (Fluke 170 and 110 Series Digital Multimeters), Clamp Meters (Fluke 320 and 370 Series Clamp Meters) and Electrical Testers (Fluke T5, T6 and T6+ Electrical Testers).
