VeriShield™ 100 Passive Earmuffs

Enhanced Hearing Protection with Optimum Comfort

Features

- Internal Cup Baffle Design® is the patented built-in sound stabilizer designed to enhance the stability of the cup and controls how sound reaches the ear, ensuring optimum noise attenuation across all frequencies
- Wider cup opening ideal for workers with larger ears or who wear hearing aids
- Memory foam ear cushions that combines denser and softer foam
- Air Flow Control Technology (AFC) delivers optimal attenuation, allowing smaller earcup to have higher attenuation
- Manages flow of air in & out of ear cushion acting as a shock absorber
- Easy to use snap-in ear cushions for quick and easy maintenance
- Robust construction
- Resilient cup cushions last up to 12 months, reduces cracks and deformities
- ABS moulded and hot stamped surface finish cup withstands oily, heavy work environments and frequent cleaning
- For noise environments between 105 to less than 110dB
