# CABLE & HOSE IDENTIFICATION

Using tear resistant material with an exaggerated clear laminate flap, ID Wraps are ideal for cable and hose identification.

Simply write on the white area of the label, stick down the marked area and wrap the clear laminate around.

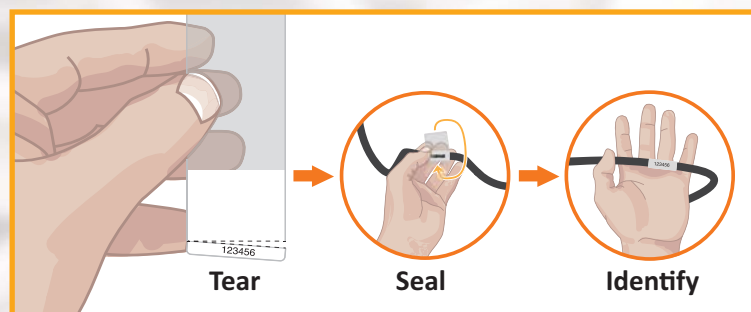

The clear laminate can wrap multiple times around the cable or hose to give extra protection to the written area.

The wraps also include a perforated section with sequential numbers that is easily removed or folded out of view if not required.

## Makes identification quick and easy

- Packs of 100 @ 110mm x 32mm
- Marking pen included
- Write on area 18mm x 32mm
